

SYNERGY-XS CT PICC™

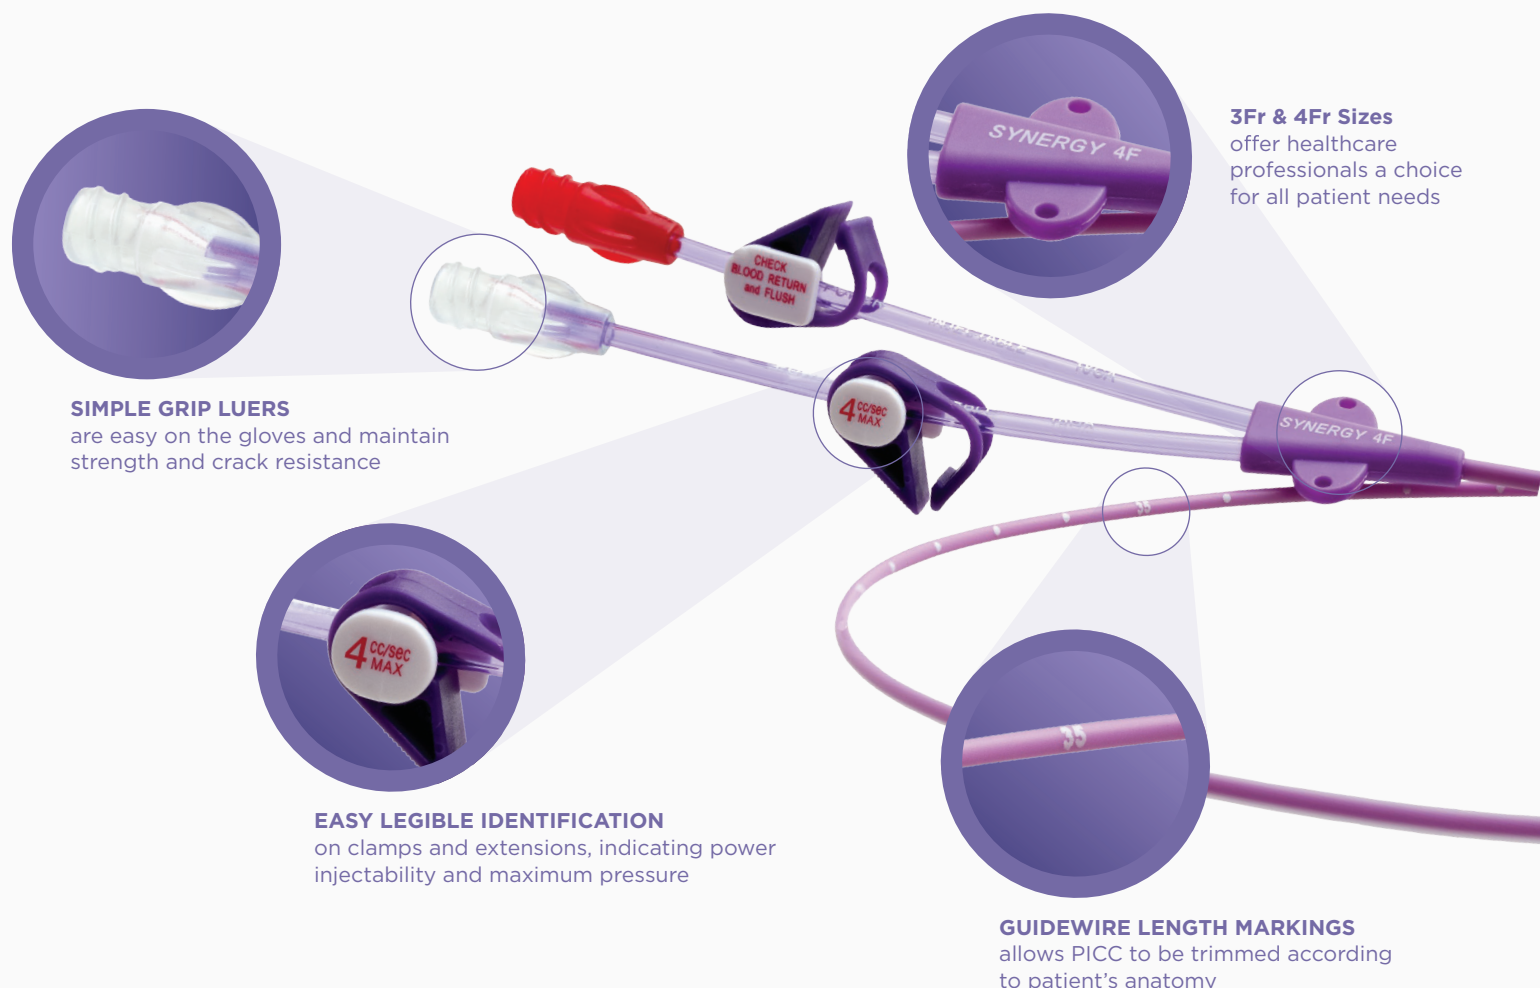

Smaller Vein PICC Access
with Power Injectability

HEALTH LINE
MEDICAL PRODUCTS

Health Line now offers a complete line of 3Fr Single and 4Fr Dual Lumen power injectable Synergy CT PICC™ catheters for patients with smaller veins. These XS CT PICCs offer the same ease and effectiveness as our popular Synergy CT PICC™ line with the advantage of giving clinicians more options in choosing the best PICC size for the patient.

The Synergy-XS CT PICCs™ are available in a variety of kit configurations including basic, nurses, and Interventional Radiology to give clinicians an assortment of options to meet patient needs.

Features and Benefits

One Piece Cannula Construction – No bonds or welds helps to ensure catheter will not break.

CVP Monitoring – SYNERGY CT PICC™ (power PICCs) are indicated for central vein pressure monitoring.

Polyurethane Catheter Construction – Provides radiopacity, durability, and strength.

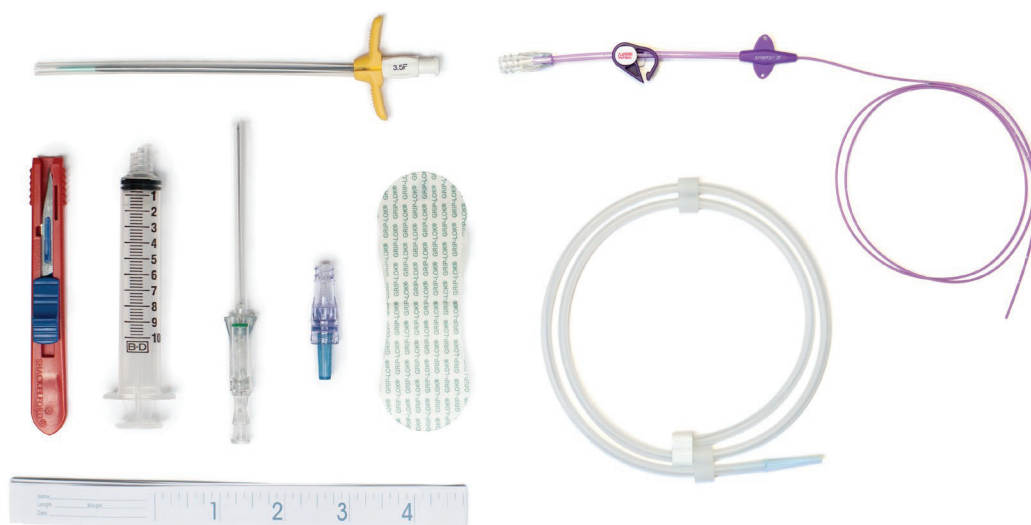

Low Profile Hub – Allows for better patient comfort and easy securement.

Grip-Lok™ – Stabilizes and locks catheter securely in place reducing needlestick injuries.

Safety Components – Kit trays include a range of safety components such as, safety scalpel and safety introducer needle to improve patient and clinician safety.

Synergy-XS CT PICC™ (Peripherally Inserted Central Catheters)
