Features and Benefits

Thermal Reactive Polyurethane Material – Softens after insertion for improved patient comfort.

Simple Grip Luers – Easy on gloves and color coded for multiple treatment options.

Large Side Holes – Improves flow rates and infusion times.

The ORION™ CVC is indicated for short term (less than 30 days) access to the central venous system for intravenous administration. They are available in a variety of sizes and lengths so that clinicians have the options necessary to meet the patient's needs.
